Emergency Reporting	Emergency Reporting	Incident reports	Database, text	Administration	None, historical archive	None, Historical Archive
Motorola	Astro Portable/Mobile CPS	Radio programing	Database, text	Radio Coordinator	As needed	As needed

Senate Bill 272, approved on October 11, 2015, adds a section to the California Public Records Act requiring local agencies to create a catalog of Enterprise Systems by July 1, 2016 with annual updates.

An "enterprise system" is a software application or computer system that collects, stores, exchanges and analyzes information that the agency uses that is both of the following:

- * A multi-departmental system or a system that contains information collected about the public.
- * A system that serves as an original source of data within an agency.

An Enterprise System does not include any of the following:

- * Information Technology security systems, including firewalls and other cybersecurity systems.
- * Physical access control systems, employee identification management systems, video monitoring and other physical control systems.
- * Infrastructure and mechanical control systems, including those that control or manage street lights, electrical, natural gas or water or sewer functions.
- * Systems related to 911 dispatch and operation or emergency services.
- * Systems that would be restricted from disclosure by Section 6254.19.
- * The specific records that the information technology system collects, stores, exchanges or analyzes.

SBS 272 requires that the agency:

1. Create a catalog of enterprise systems, containing:
 - * Current system vendor
 - * Current system product
 - * System's purpose
 - * A description of categories or types of data
 - * The department that is the prime custodian of the data
 - * The frequency that system data is collected
 - * The frequency that system data is updated
2. To make the catalog publicly available upon request
3. To post the catalog in a prominent location on the agency's website

Exception:

If the public interest served by not disclosing the information described clearly outweighs the public interest served by disclosure, the local agency may instead provide a system name, brief title or identifier of the system.
